Specializing in Fire, Building, and Life Safety

FSCI offers a full range of fire, building and life safety services including:

- ◆ Plan Review Services of Building Code, Fire Code, Life Safety Code and Fire Protection System Standards
- ◆ Inspections and Testing of Fire Protection Systems
- ◆ Consultation related to Building Code, Fire Code, Life Safety Code and Fire Protection System Standards
- ◆ Educational Seminars
- ◆ Fire Protection System NFPA 25 Inspections
- ◆ Fire Service Planning And Management
- ◆ Fire Investigations Related to Fire Protection Systems and Equipment

FSCI was formed in 1983 as a firm of fire protection specialists dedicated to providing the highest quality, code-based fire protection plan review services. We are one of the largest private plan review service companies in the United States, providing plan reviews for more than 185 municipalities and fire departments as well as many private companies throughout the U.S. Because of our fire protection roots, we will always work with local authorities to resolve all issues based on code requirements.

Participation in the code development process gives our staff an intimate knowledge and understanding of many codes and standards. FSCI principals and senior consultants are involved in the code development process on the national and state levels. Some of these committees include NFPA 13, NFPA 24, NFPA 72, NFPA 101, NFPA 291, NFPA 1201/1250, NFPA 5000, and the ICC International Fire Code.
