

NOTES:

1. Rod to be a #3 billet deformed round bar or approved by the engineer.
2. Rod shall extend into undisturbed ground a length sufficient to provide secure anchoring, as required by trench conditions and approved by the engineer.
3. The anchoring length and pipe diameter plus 3.00' shall determine overall length of rod.
4. Upon extension of the lateral to the property line, the rod shall be salvaged, straightened and reinstalled as shown for wye above.
